Java

```java
class Solution {
    public int[][] divideArray(int[] nums, int k) {

    }
}
```

JavaScript

```javascript
/**
 * @param {number[]} nums
 * @param {number} k
 * @return {number[][]}
 */
var divideArray = function(nums, k) {

};
```

C++

```cpp
class Solution {
public:
    vector<vector<int>> divideArray(vector<int>& nums, int k) {

    }
};
```

C#

```csharp
public class Solution {
    public int[][] DivideArray(int[] nums, int k) {

    }
}
```
